# Why Wait?

WHAT DOES GOOD FOOD ...

LOOK LIKE?

TASTE LIKE?

A collection of imperfect vegetables including carrots, potatoes, and rutabagas. The carrots are orange and have various shapes, some with multiple roots or unusual curves. The potatoes are light brown and have irregular, bumpy shapes. The rutabagas are dark purple and have a bulbous, irregular shape. The vegetables are arranged on a grey surface against a white background.

# Good Food Looks Perfectly Imperfect

120 million pounds of  
food is wasted by US  
every year

**BUT**

**49 billion pounds  
feeds every hungry  
American**

# Good Food Tastes Divine

When **love** for our farmers,  
packers, distributors, cashiers  
and cooks ... is poured into a  
dish

**you can taste it**

# Wielding Your Fork for Good

You can enjoy a taste of heaven and so can they...

A close-up photograph of two silver metal forks positioned horizontally against a white background. Each fork has a small, neat coil of yellow spaghetti pasta wrapped around its tines. The spaghetti strands are thin and appear slightly moist. The forks are angled slightly towards each other, with their handles pointing downwards and outwards.
